

Data sheet

Ski cabinet with electronic shoe drying system

Type 2

Type 4

Type 4max

Ski cabinet

Steel sheet and profile steel construction, electroplated zinc and plastic-coated or stainless steel / Inox, standing on feet or wall-mounted.

Closing system

Deadlock, mechanical or electronic combination lock, key card lock,...

Boot dryer

The cabinet is equipped with heating elements. Ski shoes, runners, walking boot etc. can be put on it for drying and warming.

The drying process is based on a specifically developed, electronically driven, electrical heating system.

Heating temperature is below 50 °C, so the special lining of modern skiing boots will not be affected. Heating time can be checked by timer. For use in pretty cold rooms the dryer can be equipped with double heating performance.

Notice:

Further styles, closing systems, customized system solutions and special accessories (e.g. special colour) on request.

Type 2

with drying system for 2 pair of boots and 2 pair of ski/snowboard

Type 4

with drying system for 4 pair of boots and 4 pair of ski/snowboard

Type 4max

with drying system for 4 pair of boots and 4 pair of ski/snowboard
